

H. HORIZON

PROJECT PROPOSAL · PHUKET PROVINCE · OCTOBER 2026

# Horizon

## *International AI Academy · Phuket*

> Learn AI. Build companies.
> From Phuket, for the world.

A project: the academy is not open yet.

THE CONTEXT

# The world of work is changing. *Fast.*

## 39%

of workers' core skills are expected to change by 2030.

World Economic Forum, Future of Jobs Report 2025

## 8.7 million

Thai workers are affected by generative AI: 2.2 million may see part of their tasks replaced, 6.5 million can be helped by it.

NESDC, 25 May 2026 (estimate)

## 20 million

Thais: the goal announced by the Ministry of Higher Education (MHESI) for basic AI training within four years.

MHESI, reported by The Nation, 5 May 2026

The question is no longer *whether* to learn AI, but *who* will know how to use it in their own work.

THE IDEA

# A school that creates companies.

*Most schools produce graduates.*
*Horizon would produce founders.*

Horizon would be an AI academy: online for the whole world, with a campus in Phuket. Students would learn AI, then build real applications for real businesses. They would leave with skills, a working product, and the beginning of a company.

Learn → Build → Launch

THREE PROGRAMS

# Three programs. *One path.*

1

## Understand AI

THE WAY IN

What AI is, what it can do, and its limits. With **ikigai**, a Japanese method, each student finds their own direction.

2

## AI in tomorrow's careers

DO YOUR JOB BETTER, WITH AI

Example: the accountant who lets AI handle data entry, and spends their time on analysis and advice.

3

## Build applications

FOR FUTURE FOUNDERS

Each class builds a real app for a partner business. The final exam: a working application.

*An application project takes about 2 to 3 months. AI moves fast, and so does Horizon.*

THE PHUKET CAMPUS

# Not a classroom. *A startup studio.*

- **Teams built on ikigai**
  One student strong in code, one in strategy, one in design. Teams are complementary by design, never random.
- **Every continent in one room**
  Europe, Asia, the Americas, Africa, Oceania: different ways of seeing work, one shared project.
- **Real projects for Phuket**
  Fishing, scooter rentals and garages, restaurants, hotels, sports academies... every industry is a possible project.
- **Demo Day**
  Each cohort ends with a public presentation to investors and businesses, broadcast live on social media.
- **Launched with Mabido**
  The strongest projects of each cohort receive marketing support from Mabido, our marketing partner.

A CLASS PROJECT, FOR EXAMPLE

# Phuket's scooters, *connected.*

Phuket has **370,614** registered motorcycles. Rental shops, garages and parts suppliers still work separately.

Department of Land Transport, 30 September 2026

A class could build the platform that connects them: every scooter registered with its model and mileage, maintenance alerts based on the manufacturer's schedule, and the right garage and the right part, here in Phuket.

*And tomorrow: tools for fishermen, restaurants and hotels, designed in Phuket, with Phuket businesses.*

FICTIONAL EXAMPLE

Scooter No. 14 · 125 cc · 11,800 km

Brake pad check recommended before 12,000 km (manufacturer schedule).

→ Book at a partner garage · part in stock at a Phuket supplier

FOR PHUKET

# What Phuket gains.

01

## New companies, born here

Every cohort launches projects with Phuket partners: wealth and jobs created on the island.

02

## Talent from around the world

People who come to Phuket to learn and build, not only on holiday, and all year round.

03

## Stronger local businesses

Tools built for and with Phuket's businesses, and local people trained to use AI in their own work.

04

## A new reputation

Phuket is known worldwide for its beaches. Horizon would make it known for its talent.

05

## In line with Thailand’s AI push

The Ministry of Higher Education’s goal of 20 million people trained in AI, and Phuket's smart city plans (Smart Area certificate for Phuket Tinicon Valley, August 2025).

A ROLE AT THE HEART OF THE PROJECT

# A Founding President, *from Phuket.*

Horizon needs a face in Phuket: someone who knows the island, its institutions, and the power of a strong image.

- Represent the Academy with Phuket's institutions, businesses and partners.
- Choose the first class projects for Phuket: for example, an AI tool that helps local businesses create content for social media.
- Lead its image and its marketing, in Thailand and abroad.
- Open the first Demo Day.

*A role we would be honoured to discuss with you.*

# Phuket first. *Then Asia.*

## Phuket

The first campus

## Bangkok

The next step

## Asia

Vietnam · Bali · the Philippines · Singapore

Today, the world's AI builders gather in a few places, led by San Francisco. Asia has room for a place that trains people in AI and turns their projects into companies. Phuket can be that place, and every new campus would start from the model created in Phuket.

*Applications built in Phuket can work in every city that follows.*

WHY NOW

# Every month counts.

AI changes every week.

Talent goes where things are being built.

Other cities in the region are already moving.

## Look at what San Francisco has become in three years.

## *Asia's equivalent has not been chosen yet.*

A decision in weeks, not months, would give Phuket the lead.

NEXT STEP

# Let's meet.

We would like to show you Horizon live: a 30-minute demonstration in Phuket, at your convenience.

1. A meeting and a live demonstration.
2. Your guidance toward the right institutions and authorisations.
3. Introductions to Phuket businesses that could become our first partners.

The founding team: Bruno (entrepreneur, Phuket) · Franck Caquériot (creator of the Mabido AI system) · Yanis Coolen (designer of the Horizon AI system) · with Mabido, mabido.com
